Dear Parent or Guardian,

Each school district in the Commonwealth is required to implement a program of “integrated pest management” with the primary goal of preventing and controlling pests through strategies that may include judicious use of pesticides. The application of pesticides in the school or on school grounds during times when children are present is limited by state regulation, but there may be occasions when, after consulting with a certified pesticide applicator, the school administration determines that a pesticide application is necessary when children are present in the school.

As required by state regulation, we have created a registry for parents or guardians who wish to receive an electronic message or telephone call prior to the application of pesticides in the school when children are present. Please provide school administration your email address or phone number if you wish to be placed on this registry.

I wish to be added to the registry to receive notifications prior to the application of pesticides in my child’s school when children are present.
